5 Pence

Company Description

5 Pence was founded by Simon von Witt at the end of 2018, who was also the founder of the Woodstock Gin Co. He discovered his passion for distilling in 2008, after spending a year in Italy, where he taught English and tasted some of the finest liqueurs and grappa on offer. He decided to learn the art of distilling and replicate these liqueurs back home in South Africa. After a few 2 years of experimenting and selling his wares at markets, he decided to start a small business. What started off as a small weekend business and ran for several years as such, became a full-time job, when he decided to embark on making gin in 2014.

HONEY AND ALMOND SKINCARE

Company Description

A naturally perfect beauty program recreated from centuries old beauty secrets and formulae. In the late 1930's, British singer and actress, Angela Wall, opened her exclusive beauty salon in Hanover Square, London. Her clients, who reportedly included members of the Royal Family, were treated with her own brand of all-natural beauty creams. Legend has it that the creams were based on recipes developed centuries earlier in a convent in France. There nuns produced the creams using ingredients from the Abbey grounds and sold them to raise funds. Angela Wall improved and perfected the product and the brand name "Angela Wall" was established.
